

El Dorado Irrigation District

Report of Licensee

The report requires data on the “Amount Directly Diverted or Collected to Storage.” El Dorado Irrigation District does not presently collect, maintain or have the ability to collect or calculate this information. Consequently, this column has not been completed. Consistent with past reporting practices, El Dorado Irrigation District submits only the amount used which is equal to the gaged releases from storage. El Dorado Irrigation District will supplement this report with information on the amount directly diverted or collected to storage as that information becomes available. “Maximum Rate of Diversion” values are releases from storage.
