

El Dorado Irrigation District

Attachment to Supplemental Statement of Water Diversion and Use

Statement Number: S010717

As reported in S010717, El Dorado Irrigation District (EID) diverts water directly from the South Fork of the American River to supply domestic water to the residents of Strawberry. In years past, EID has erroneously reported its use in S010717 under a riparian claim of right. Please revise your records to show that water use reported in S010717 is made under a Pre-1914, rather than a riparian claim of right. The Pre-1914 right is the same right (70 cfs direct diversion from the South Fork American River) as reported on S009034; this second point of diversion is reported separately.
