

El Dorado Irrigation District

Attachment 1 to Supplemental Statement of Water Diversion and Use

Part 2, Step 4 of the new report requires data on the “Amount Directly Diverted or Collected to Storage.” Previous reporting forms have never required this information, El Dorado Irrigation District does not presently collect, maintain or have the ability to collect this information. Consequently, this column has not been completed. Consistent with past reporting practices, El Dorado Irrigation District submits the amount used which is equal to the gaged releases from storage. El Dorado Irrigation District will supplement this report with information on the amount directly diverted or collected to storage as that information becomes available. The data given in the “Rate of Diversion” column are the maximum average daily releases from storage in the given month.
